

COVID-19

There is a lot of information and changes happening because of COVID-19. We are aiming at consolidating a lot of it in this section. If you notice any outdated information, please let us know.

- **First aid procedures**
 - **Basic Life Support (AR and CPR)**

First aid procedures

Review of what is different between the typical CSP protocols and the COVID-19 modified protocols.

Basic Life Support (AR and CPR)

DRAFT

Extra measures must be taken to provide Basic Life Support in a COVID-19 world. One of the most stunning modification to our protocols is the removal of ventilations from the entire Artificial Respiration and Cardiopulmonary Resuscitation.

Based on the latest directives and discussions between CSP Yukon Zone instructors on October 16th (*BLS non covid vs covid procedures summary.doc*):

		Non COVID (normal)
time	mod	etc
am BLS	Check vital etc	No change

		Position of airway, jaw Clearing the airway as obstruction, etc, etc...
		Proper seal, correct equipment Re- (mask, breather A.R. rebreather, etc) with triangular , only rate etc, etc ...
		How, type Same no but blind must use wear Suction leaving, that surgical 5 mask, seconds etc pro etc..

		Fit, size Same when how must inf wear OPAs gown, child rigid positioning, etc, faceshield/eye etc pro ...
		How to set up, O2 rate, fit for DO BVM, CNOT 1 USE or 2 person, points of failure (physical/mechanical)
